

1. Enter Your Starting Point:

City: Kyle

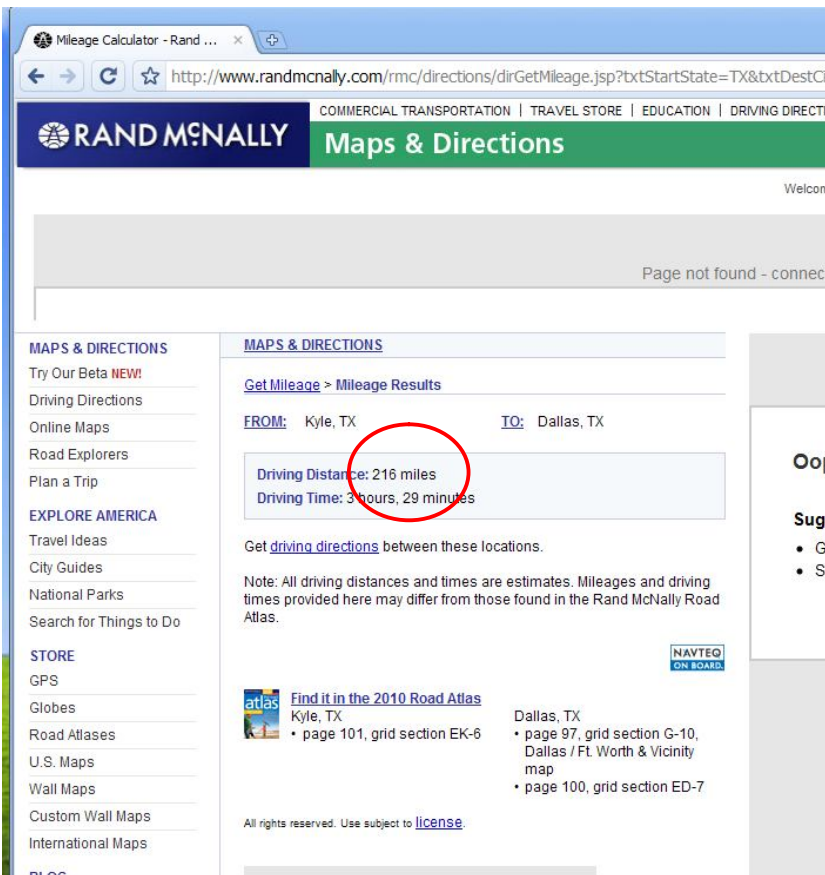

State: TX

2. Enter Your Destination:

City: <project city>

State: TX

3. Then click Get Mileage>

The driving distance will be displayed.

1. Double this amount to cover round trip miles.

2. Multiply times rate of \$.60 to get mileage costs.

EG. 216 miles
X 2
 432 total miles
X \$.60 rate
 \$259.20 total cost
